

## **How will we be spending the Sports Funding and who will benefit?**

Governors and Staff at Westminster believe that the money should be used to support all children in their PE and sport activities across school. The most able children should be challenged through participation in competition whilst the less able should be provided with opportunities to develop fundamental skills. We want to see children attending local high schools with a positive mind set about PE and Sport and to feel the confidence to pursue sporting clubs at different levels.

Below is a rundown of how we intend to use the sports funding during 2018/2019:

### *Blackpool Community Trust Offer*

We spend approximately £5,000 of the sports premium on BFC community offer. This provides highly skilled coaches in PE lessons for the children to work with. Additionally, the teachers receive high quality CPD during these lessons. The package supports the work we already carry out in PE and ensures that we remain up to date with changes to the PE curriculum. Additionally, BFC provide and support with extracurricular activities to ensure high quality opportunities and competitions.

### *Hiring qualified sports coaches*

Approximately £6000 of the funding is used by joining with the services of Evolution Sport, we will benefit from working alongside qualified sports teachers and coaches. Coaches will work alongside class teachers from Reception to Year 6 to enhance the delivery of PE lessons throughout school. The children will develop fundamental skills in the infants and will learn how to develop these in team games in the juniors. In addition to this, teachers will have opportunities to share good practise with the coaches and develop their own skills in leading their own PE sessions. We will ensure that the coaches work alongside newly qualified staff and teaching students to ensure consistency in planning and assess for PE across school.

### *Providing places for children in after school clubs*

We want all children to take part in after school clubs and already have a large majority of our children taking part in such activities. We want to continue this good work. By training staff through the use of coaches, more teachers and support staff are able to run clubs after school. This is providing further opportunities for children to attend clubs from Foundation Stage to KS2.

### *Increasing participation in school sport*

By working closely with other schools we are developing new ways to increase participation in team games at lunch times. We have spent money on playground leader and playground training for staff and children across school. This will support children in taking part in at least thirty minutes of exercise each day. Children are also learning to be team leaders planning for and organising their own team games. We are also trialling the 'Westminster Mile' encouraging children to move around our playground at break times

### *Updating equipment*

Training of children and staff has identified the need for new equipment. Playground leaders have listed the things needed, which the funding has allowed us to supply. This ensures that children can continue to participate in school sport at break times.

### *Providing Interventions*

Due to staff CPD and increased training through the use of coaches, teaching staff have a better understanding of how to plan for and assess their own PE sessions. As a result, teachers are able to highlight target children who need further support with their fundamental skills. We are therefore providing coaches to work with teachers in PE sessions to run interventions for target children. This will ensure that all children leave KS1 mastering each fundamental skill and children in KS2 can gain extra support in specific skills in order to play team games successfully.

### *Providing PE kit for all children*

We provide full PE kit for all children (pupil premium funding assists in this area of funding of this) This means there is no time wasted looking for kits or trying to borrow siblings'. We will be looking at extending this to Sweatshirts and jogging bottoms to be used outdoors in cooler weather.
